Art Unit: 1772

1. Upon further consideration and a review of the claimed subject matter and a view of the newly uncovered prior art references, the finality of the last Office Action (paper no. 5) of March 6, 2000 is being withdrawn.

Prosecution is reopened and a complete Action on the merit follows.

- 2. Claim 13 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hangwitz for reasons of record in paper no. 3, paragraph -3, mailed September 8, 1999 and paper no. 5, paragraph -1, mailed March 6, 2000.
- 3. Applicant's arguments filed April 15, 2000 have been fully considered but they are not persuasive.

Applicant argues that Haggwitz teaches only the use of permanent adhesive and not an adhesive of temporary adhesion nature, and that the temporary adhesion nature results in no damage to the surface on which the sticker is applied.

These are not deemed to be persuasive because Hatquitz clearly teaches an affixable - detachable paper sheet, with adhesive in the form of microdots such that the affixable paper can be removed from a second paper in substantially original condition. Applicant should note that the Hatquitz clearly teaches that reducing the surface area of the adhesive to small dot yields secure adhesion and yet allows substantially non-destructive removal from the surface of attachment. Hence, Hatquitz's adhesive does exhibit the property of an adhesive of "temporary adhesion nature.

1.

Thus, in the absence of any evidence to the contrary, it remains the Examiner's position that the claimed invention is anticipated over the prior art of record.

- 4. The following are new grounds of rejection in view of the newly discovered prior art.
- 5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

- 6. (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 7. Claims 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Madole (5,299,833).

Madole relates to a paper sheet having a first area provided with a strip of repositional pressure sensitive adhesive (PSA) and a line of separation between said adhesive first area and the adhesive-free second area as shown in the drawing (figures 1-4). The weakened tear line is located within the second area. Further, figure -1 shows tear lines 16 or 18 that separates the sheet into two sections and wherein said tear lines 16 or 18 originates with at least one first area and ends within one second area.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nasser Ahmad whose telephone number is (703) 308-4424. The examiner can normally be reached on Monday - Thursday from 8:30 am to 6:00 pm. The examiner can also be reached on alternate Friday.

Application/Control Number: 09/253174
